Re: 2010 Recycling Tonnage Report

Interstate Batteries collects and disposes of spent lead-acid batteries.

All spent batteries collected are sent to a smelter approved by the U.S. Environmental Protection Agency. At these smelters, the batteries are broken down and then lead, plastic and acid are processed and recycled.

The attached report as per your request, lists by zip code the tonnage in pounds which has been collected and recycled.

Thank you

A handwritten signature in black ink that reads "Brinda Kostro". The signature is fluid and cursive, with a long horizontal stroke extending to the right.
