

## Recertification Tracking Form New Jersey Certified Recycling Professionals January 1, 2013 – December 31, 2014

In response to requests and comments from the CRP community, the Advisory Committee for the certification program has revised and updated the recertification process. As of January 1, 2011 all CRP's have two (2) years to complete a total of twenty (20) hours of recertification credits. Of this total, a **minimum** of six (6) must be classroom or course-based training; the remaining fourteen (14) hours can be earned through **pre-approved** meetings, conferences or other technical training. It is **your** responsibility to maintain a record of the courses you attend and forward that information to the Rutgers/New Jersey Agricultural Experiment Station Office of Continuing Professional Education (OCPE) when you have fulfilled the requirements for recertification. The form must be returned to OCPE within one (1) month of the end of the recertification period to document recertification efforts during the prior two years.

The following summarizes the recertification credits I earned during the period January 1, 2013 through December 31, 2014. I understand that if the credits were offered through an institution OTHER than the New Jersey Agricultural Experiment Station Office of Continuing Professional Education or the Association of New Jersey Recyclers (ANJR) they must be pre-approved for credit applicability. **EXCEPTIONS OR POST EVENT APPROVALS WILL NOT BE GRANTED**. For non-OCPE or ANJR events, please enclose a course schedule or syllabus and proof of attendance (including contact name and number for verification).
